Mr. Schreiber, please search the following sequences in commercial databases:

- 1) Oligo search of SEQ ID NO:2 against nucleic acid databases (please provide 30 hits).
- 2) Standard search of SEQ ID NO:31 against nucleic acid databases.
- 3) Oligo search of SEQ ID NO:31 against nucleic acid databases (please provide 30 hits).

Please search the following sequence in commercial and interference databases:

- 4) Standard search of SEQ ID NO:2 against nucleic acid databases.

Please save results to diskette.

Thank you very much.

David J. Steadman

Art Unit 1652
Crystal Mall 1, Room 10D-04
(703) 308-3934

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.rnpm** and **.rnpn**

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapn**

The Pending database search results should not be left in the case because they contain data that is confidential.
